

Better Spaces | Better Lives

We're on a mission. To further improve Kiwis' quality of life by improving the spaces Kiwis live and work in. Healthy homes equal a healthy nation.

Homotech specialises in ventilation and daylighting. We offer design support for houses to apartments alongside installation and our peace of mind 10-year leak proof guarantee for penetrations.

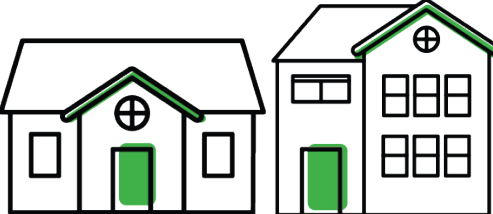

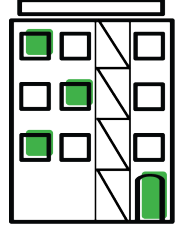

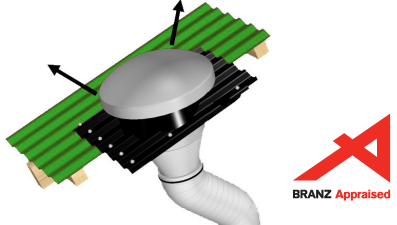

Our goal is to make the potentially complex easy by delivering three things:

1. The right advice
2. Really good products – guaranteed
3. A nationwide certified installer network

This ventilation product application guide is a no fuss tool to make it easy to complete ventilation designs without needing to be an expert. In 3 easy steps you can find the right systems for your space:

1. Find your application (building and penetration)
2. Pick a room
3. Find your product (see over for product descriptions)

And if you want a hand one of our specification managers will be available to assist.
